Compliance:

Our vision is to build a better future for our planet, working hard to ensure that environmental sustainability and low carbon impact is at the forefront of our thinking and innovation. As a responsible and ethical brand we ensure all of our manufacturing methods go above and beyond the ideals of our growing customer base, using only factories that are GOTS, RCS, SEDEX, BSCI or Oeko-Tex Certified

Why use EcoViscose?

EcoViscose (a man made natural fibre) is derived from cellulose extracted from sustainably sourced wood pulp

The pulp is then dissolved, spun, finished and dried ready for knitting using a 100% chlorine free process

This closed loop process ensures all water and chemicals used are collected and re-used

Ensures:

Reduces:

Saves:

- 0% pollution impact on ecosystem
- All wood and pulp is sourced from responsibly managed forests
- Dependence on landfill as end products are fully biodegradable
- Soil erosion through multi-crop farming
- 50% less water , fossil resources and CO2 emissions compared to generic viscose production

Did you know?

Our LENZING™ ECOVERO™ branded EcoViscose fibres are certified by the Forest Stewardship Council (FSC) or Programme for the Endorsement of Forest Certification (PEFC) ensuring our commitment to a sustainable future.
